Works great. Is currently hooked up in my pick-up so when it gets bought I will unhook from my pick-up and hook it up in your vehicle so you know it works. It has a diagnostics option too so it will tell you what your check engine light is all about. It comes with an update kit for new tunes and such. $150 obo. The update kit was $50 alone. Just selling to get a touchscreen one.

Below is the application list for what the programmer all works in:

The list is what it will work in, so no it will not work in your diesel's.
