1995 Ford F-250, powerstroke it's an XLT with power lumbar, cruise control, electric windows, locks and factory keyless entry, auto tranny, 4x4 with auto hubs. Runs great doesn't use oil, oil changed every 5k along with fuel filter. A few minor dents one on drivers door and one on bottom of tailgate.
The bad windshield has a crack, power steering pump or hose drips a little sometimes and transmission light will flash every once in awhile. Within the past 100 miles, replaced front brakes and axle pivot bushings. It's a very solid truck and I would drive it anywhere. Will post picks later, if it's posted on here it's for sale.
