* HONDA * 13HP Motor with Powermate / Coleman - BLACK MAX GENERATOR 8125

Honda motor info:
4 stroke OHV
Model: Gx390
SERIAL #GCANK - 1061580

cold start & walkaround video
https://youtu.be/OkHX-uN0nMM

Powermate/Coleman generator info:
Surge: 8125watts
Running: 6500watts
Serial # D26012608
Model # PM0496900

Motor is clean. No problems. Great running Honda. Starts on first pull like a Honda should.
This is a very popular commercial motor used on pressure washers, generators, long shaft go-devil style motor, go-karts and more.

The powermate generator not generating power. The receptacle may just need to be changed. I'm not knowledgeable about generators to fix it myself. Have any scrap, the motor is great.
