I have a nice pontiac grand am gt, 3.4 ltr for sale, clear title, clean interior, nice body, rebuilt motor, new gaskets, seals, runs very well. Cons- needs front struts, has lower Crack across windshield, ABS and Trac off light come on, it may be wheel sensors, checked all brake pads, Alot left on them, e-brake would stick on passenger rear tire, disconnected them, seems to ride good after that. Has a nice stereo system w/remote, has underglow system also, but it was disconnected and I don't know how to.
