QR Code Link to This Post Hello,

This is my first time posting on here, so I'm pretty open minded.
That being said, I'm looking to start recording a series of EPs/Mini albums each with a different collaborator or even two and then booking shows with various alternating musicians where we would improv live (not play what's been recorded.)

Other synth players would be awesome, so would any other instrument as long as you're creative and are interested in noise, free jazz, ambient, post rock, drone and experimental music.

Please introduce yourself and tell me a bit about yourself, I'd like to work with actual human beings and not just personality-less bodies. Connections and communication are important.

Thank you for your
