QR Code Link to This Post This is a NEW custom built teardrop trailer constructed on a 5x8 frame that's super light (I don't know exact weight). Exterior is aluminum and has an insulated roof.

Comes with a new Queen size mattress and sleeps super comfortably. Interior dimensions are 84" long, 60" wide and 36" at the highest point to top of mattress. I am 6' 2" and have plenty of head room.

Has 3 LED lights, power outlets inside and in the back compartment and a 5,000 BTU air conditioner that gets the camper really cold!

Has a shelf inside and a storage compartment in the back. The very back serves as a cargo carry for a cooler and/or gear. The doors have locks and built in screened windows that open. There is a hitch receiver on the back for a bike rack or cargo carrier.
