QR Code Link to This Post Here we have a really nice running Snapper snow blower for sale. This snow blower is powered by a 3.5HP Tecumseh 2 cycle engine which starts right up every time and runs great. I have just given this snow blower a tune up which included spark plug, carburetor cleaning and fresh fuel. This unit is pull start with the electric start feature. This unit is very lightweight and easy to use. Does a great job cleaning the snow down to the bare pavement.. Get your snow blower before the snow starts to fly.

no calls after 8pm
