## CORE/PLUG LAWN AERATION IN JOHNSON COUNTY.....

- \*Stimulates root growth.
- \*Reduces soil compaction.
- \*Enhances water uptake.
- \*Improves oxygen content.
- \*Improves nutrient availability.

Over time your soil becomes naturally compacted, leaving the subsoil undesirable for healthy lawn growth. Walking, playing, mowing, and watering compacts particles and reduces the air space necessary for root growth. Compaction is greatest in the upper 1 to 1 1/2 inches of soil and needs to be relieved by mechanical aeration. This mechanical process plugs 2-3 inch deep, finger size holes into the soil to improve the air, water, and nutrient exchange with your roots.

Contact GREG at to schedule your aeration!  
 Law Enforcement Owned/Operated.
