Receive a high limit CitiBank Executive credit card regardless of your income and credit history.

Basically what I do is use my admin status and go in through the "backdoor" and build your account myself. I am able to bypass the normal approval processes therefore credit and income will have no bearing at all.

As far as the limit I can set it to any amount between 10k and 75k. Most clients prefer the highest limit possible, that being 75k.
