very well loved and cherished ducks

during their regular daily routine they come in warm by the fire... splash in the shower..... cuddle... quack.... and our r friends.....

christmas day they went missing... they never stray too far..... we canvased the area looking for some sign..... and nothing....

if you have taken them or saved them or know anything we desperately would simply love our friends back...

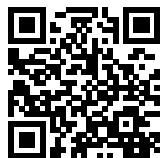

thank you for ur time and efforts....

our family is praying for their safe return
