Are you a computer savvy professional interested in earning some extra income? We have a long term contract opportunity that will give you the ability to work independently, part-time.

Veriant Solutions is actively seeking a back up technician to provide occasional onsite support service to restaurants, swapping out registers and point of sale machines.

Position is on call from home. You will earn compensation each week regardless of calls.

You will need to be able to pass a background screen, DMV record, and drug screen.
You should have your own reliable transportation, smart phone, basic work tools, and laptop.
A flexible schedule is ideal.
