Product Details

This Casio projector lets you quickly setup a slideshow or presentation in almost any room

Improve the efficiency of your presentations with this Casio projector. Featuring a slim profile and a light weight, this easy-to-use Pico projector allows for quick and simple setup in the boardroom, classroom and everywhere in between. A projection range between approximately 8 feet to 16 feet makes this projector ideal for both small and large rooms, and a lamp life of up to 20,000 hours in normal mode makes it a cost-effective way to deliver audio-visual information to groups.

Casio Pico projector makes it simple to display slideshows and presentations from the boardroom to the classroom

DLP projection delivers seamless visuals and requires little maintenance for extra convenience

Brightness of 4,000 lumens and 1800:1 contrast ratio provide lifelike color and dynamic black hues Resolution of 1200 x 800 gives you ample room for detailed visuals

High-quality lamp lasts up to 20,000 hours to save you money on replacement costs

Coverage range of 7.9' to 15.8' allows for simple use in rooms of almost any size

Throw ratio of 1.15 to 2.30 ensures easy viewing

Features a 1-watt speaker for high-quality audio output

Features USB and HDMI connectivity options for versatile modes of use

Display presentations, slideshows or movies with this slender Casio projector. This projector features a low-profile design that requires minimal space for installation and storage and is easy to carry with you on business trips. Featuring both an HDMI and USB port, this white projector is compatible with a range of input devices, including both Windows and Apple-based systems.

Versatile

This DLP projector displays images up to 300 inches across while remaining crisp and clear for images as small as 18 inches. Possible projection distances of 7.9 to 15.8 feet make it ideal for a wide range of meeting rooms, boardrooms, lecture halls, and you can use the projector in a variety of ways.

The 1-watt speaker comes pre-installed on the device, so you don't need to buy a hard-to-find external speaker system. Use the built-in speaker to deliver high-quality sound without worrying about finding a compatible external speaker system.

Long-Lasting Lamp

The included lamp on this projector lasts up to 20,000 hours during normal use, saving you money and promising months of use. This lamp has features a brightness of 4,000 lumens for the best quality images that look true-to-life for accuracy and quality during presentations.
