QR Code Link to This Post have you had a fender bender lately? mirrors hanging from the side of your car perhaps? or maybe just need a body part? or interior part replaced?. i am very good at taking apart, bending things back into position, then putting your car back together like it looked before. i've had customers that had \$7000.00 dollar esitmates roll out of my shop in under \$2000 dollars. i'm very meticulous in my work, and determind to save you money. I own 2 cars that had previously been totalled by insurance companies, that are on the road today. i also have before and after pictures of said cars. I don't give estimates over the phone, and I don't do rust repair. I charge by the job not by the hour. all of my customers have been pleased by my work, and recommend me to others. i'm sure you'll do the same. my name is Jim, and my work is honest. so give me a call, so I can put your car back.
