QR Code Link to This Post We are pro level, very experienced singer/guitar, lead guitar/songwriter, and drummer ISO bass player.

We have a lot of stuff that sounds like old Memphis soul, Some but less Americana, JAM, power pop, Groove, Just a whole stew. I don't know, Make sense? We need somebody that can reference a vast record collection!
We are hoping for super upbeat and positive, after all this is fun! We love dynamics and the professional ability to control space and volume.
A good start on about 50 to 60 original songs, most with demos.
Would like to stay clear of blues, classic rock, or hard core country. Great music, just not where we are headed.

Bass influences? maybe James Jamerson, Carol Kaye, Duck Dunn, Paul McCartney, Gene Simmons!?
