QR Code Link to This Post For 16 years I have worked from my home office for a very large Green manufacturing company. They are a Shopping Club, like Sam's or Costco without a retail site. They offer less expensive, safe products for the home. They have the same delivery system as Amazon. I do not sell products, carry inventory or distribute.

We set up shopping club accounts from our home offices. For anyone who does NOT want to work for an MLM based company; this may be an excellent fit!

We are currently expanding. The Company is experiencing record growth. There has never been a more exciting time to be a part of this!

Must be dependable, green-minded, a self-starter and love working with and helping others!
