QR Code Link to This Post I need help writing a book that will be used to expose the Poisoning of New Zealand. I lived in New Zealand for 7 years late 90's and it is a toxic waste land advertised as a 'Clean & Green' country when the absolute opposite is true. New Zealand used relabeled Agent Orange to make dairy pasture for 50 years, resulting in New Zealand having the Worlds highest cancer & suicide rates. The book will explain why I ended up in New Zealand and why I was deported back to the USA after 22 years.

New Zealands own politicians have said if this truth gets out it will destroy the New Zealand economy & this what I intend to do to the best of my ability.

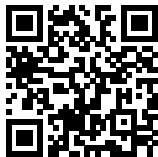

I will agree to a commission if publishing is successful. I will agree to a percentage of any reward if New Zealand pays us to not write a book.
