QR Code Link to This Post Hello my name is Mel and I have been playing, writing and studying music seriously for about 6 years and teaching for 2. I can teach you or a loved one electric/acoustic guitar, bass, music theory(how to actually apply it to your playing/writing), and basic home studio recording. I can teach beginner - advanced musicians/artists everything i know about music and guide them to be the musician they want. Whether you want to learn as a hobby so you can jam your favorite songs or you want to learn to become a professional musician and develop your own sound i can help. The main genre i play is metal(technical death metal and progressive metal core) but i take a lot of influence from classical, jazz, rap and modern-pop styles so i can teach a good amount of songs/concepts from those genres. I am a self taught musician so i can dumb down every concept i teach because i had to dumb it down for myself to fully grasp. Every student will have a specialized course aimed to help them achieve their desired skill level.

Ive learned that writing/playing music is all about Listening, Analyzing and Understanding what you're playing and i will do my best to teach you how to do that. I live in Hartford but am willing to travel anywhere in the Hartford county to you and I offer In-person lessons or online lessons via Skype. lessons via Skype/in-person at my home are \$10/HR and lessons in-person at your desired location \$15/HR(extra 5 accommodates traveling expenses).

You can check out original work i've made(merely to demonstrate my abilities) via: https://soundcloud.com/lolmelsucks You can also check out my Instagram via: lolmelsucks

I love everything about music. The process of writing, recording and playing music to me creates a feeling that is indescribable by words, almost transcendental. My main goal is to spread my love and passion of music with others to hopefully make them realize the true beauty of music.

Please email me regarding scheduling and such and thank you so much for reading.
