

Looking for electrician to change service cable. (East nashville)

Location **Tennessee**
<https://www.genclassifieds.com/x-257476-z>

I would like to have larger gauge wire installed from my weather head connection to the meter box then onto the panel.

Panel was changed to 200amp but service wire not upgraded. The line from pole has already been upgraded.

Pretty easy access. The run would be a total of 15-20' in existing conduit.

Service currently on.

How much roughly? Thank.
