

# Looking for Music to License (not exclusive)

Location **Tennessee**  
<https://www.genclassifieds.com/x-257478-z>

We are a technology company looking to license music for use with one of our software programs. The end user will use our software to create a memorial/tribute video. We are looking for a variety of songs that will be options for our user to play over their videos.

Here's some information about the kind of music we're looking for:

Moods/Categories: heartfelt, gentle, sentimental, relaxed, nostalgic, religious, patriotic, calm, peaceful

Genres: acoustic, classical, folk, easy-listening, celtic, contemporary, traditional, hymns

We are more interested in instrumentals, however vocals might be fine as well, particularly in traditional or religious tracks. Any instrument is fine, as well as both multiple instrument or solo-instrument pieces. We are not looking for anything too electronic, overly melancholy, poignant/tragic, tense or flashy, upbeat, fun, etc.

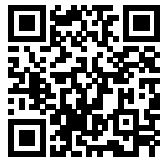

Because the music will be used in the creation of videos that will be posted by our customers to the web as well as burnt onto DVDs, we will require full (but not exclusive) rights to the songs. If you have questions about the rights, please ask and I will be happy to forward you a copy of our contract.

We are looking to purchase in bulk, so please contact us and we can discuss compensation. We are mostly looking to purchase things you already have available, however you are free to create tracks based on our specifications and we'll be happy to take a look at them, though we cannot guarantee purchase. Please include a link to examples of your work, and let us know how many and what kinds of tracks you may be able to provide. Thank!
