Hello there,

I am a professional bass player, and own my own private recording studio. Playing bass is what I do. Within the last year alone I have toured 25,000+ seat venues, performed on national television (The Voice, Conan O'Brien, Craig Ferguson twice, etc), recorded on several charting albums, etc. You get the picture! I own my own private recording studio in the hills of Hollywood, and can track clean, professional bass tracks for you remotely. I have an array of industry standard outboard gear preamps by the likes of Universal Audio, Avalon, Grace, among others, in addition to an array of Holy Grail bass amps (Vintage Ampeg SVT, Vintage Ampeg Flip Top, Fender Bassman's, Eden, SWR, etc) and HOly Grail bass guitars (Vintage Jazz Bass, Vintage P-Bass, Vintage Gretsch Hollowbody, Vintage Rickenbacker, Vintage Gibson EB-2, etc). There are over a dozen basses to choose from, so I can more than likely dial in the exact tone you are looking for. If I don't own it, I have access to anything you see at any guitar center, as well as any bass that the Gibson Showroom has available. I can typically have a 24 hour or less turn around time. Additionally, when I am on the road, I bring preamps and recording interface equipment with me because I often work on records while on tour.

If, while we are in the workflow of things other instrumentation is needed such as electric guitar, slide guitar, pedal steel, Hammond organ, acoustic guitar, 12 string guitar, baritone guitar, lead guitar, rhythm guitar, drums, misc percussion, or re-amping I can provide that as well. Discounted rates available the more tracking I do for you. In addition to all the above mentioned gear, I have an array of 40+ vintage and new guitars, over a dozen choice tube amps, 6 vintage drum kits, a dozen snares, fender rhodes, wurlitzer electric piano, 3 leslies, 2 Hammond organs and a bunch of other stuff available to track with. Essentially what ever you need I can provide.

That being said I look forward to working with you! Feel free to get the ball rollin' and shoot me an MP3 of any track of any style that you need worked on, the time frame you need it done by, and any other info or questions you may have and we'll take it from there.

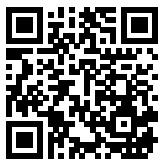

Thanks!
