I program the best automated remote control. I'll program it for you at no cost to show the value of this device. If you don't see the value in it, then no hard feelings. I've used this remote for several years and haven't had one fail yet.

These are the differences between their remotes and mine-

- 1 Mine does not use expensive proprietary batteries
- 2 This remote is very durable and less likely to break under heavy family use
- 3 This remote has large buttons and ergonomic so your hand gains a tactile memory
- 4 The remote can be programmed by anyone without the need for a computer. Mainly, If I were to get hit by a bus, you aren't stuck with a remote that has to be fully reprogrammed if you change a tv or something.
- 5 It is a Radio frequency remote, so it can operate through doors and walls. Not having to point the remote is much more user friendly. Call Greg at Four Eight Zero-233.
