2006 harley sportster that is somewhat of a bobber. i have tinkered with it myself at my house. it has numerous after market parts including kuryakyn horn cover, velociraptor air cleaner, laydown license plate bracket, integrated tail light with the turn signals in the housing for a cleaner look, and 2 into 1 exhaust. 12 inch mini apes and lowered shocks give it a low mean ride style. the paint is actually rattle can, but is not bad. has brand new front and rear tires, and just changed the oil 100 miles ago with synthetic oil. cranks right up and absolutely hauls. just dont need 2 motorcycles and i have alot more time vested in my other one. text 706 three 15 ten 6 seven with questions or.
