I am a single mother currently living with family. My kids and I wrongfully lost our place back in 2011 and we are trying to get back on our feet. I got a very bad back injury from my last job, and being in so much pain working all the time just to make sure my children have everything they need and want. My kids are my #1 in my life, and we need our own apt/house. I am looming for 2-3 BR \$700 a month and must be pet friendly as I have a furry son too.

I am not having any luck these days finding something a single mother can afford with a w.c. back injury. I am honest and hard working, and just can't seem to find prices that fits a single mothers wallet. If anyone knows of a place that will work for my kids and my needs, please contact us. We can't get housing assastancts they said the wait list is 18-24 months or + if your white. We need our own place we can call home again.

I want somewhere that won't be too terribly far from my job in the 80122 area.

Thanks
