

Baby Scarlet MACAW

Location
<https://www.genclassifieds.com/x-258450-z>

Alaska

Baby Scarlet Macaw, about 3.5 months old. Hand Fed, fully weaned, very healthy, gorgeous color, very friendly.

Please do your research before contacting us. Macaws are a major commitment, they require lot of time and attention. Could you commit to providing a good home for a macaw for long term?? They are not meant to be kept in cages for housing. In the wild Macaws fly 50 to 60 miles daily. Please take a note these amazing parrots live almost 80 to 90 years with proper care. Sorry, Macaws are not for everyone!

If you decide to get one, it is always better to start with a baby Macaw. Don't expect to start with a two or three years old Macaw and have good luck with it. And never get any macaw that is caught from the wild!

Serious inquiries only.
