Welcome parents

Cary: A 5-Star Skeyci children program's Preschool of Excellence

We seek to provide a nurturing and stimulating childcare environment where children are always "Children that feel, minds that create." Your child can learn and explore safely in our nurturing and secure environment in the classroom and on the playground.

Skeyci children program is not simply another daycare. We set the benchmark for quality preschool education and superior customer satisfaction. Our highest priority is your satisfaction! Contact us for a tour of our state-of-the-art facility and see for yourself what makes us so special!

Curriculum

Growing Skeyci children program's arranged the following learning areas for children to explore:

PRACTICAL LIFE

Designed to teach children to care and respect themselves and their environment, Practical Life materials allow children to develop small muscle strength and control, improve hand-eye coordination and teach left-to-right progression. Children will have opportunities to expand their life skills through activities

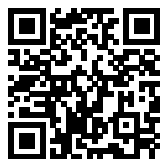

involving spoon feeding, grasping, threading, dressing, washing, sweeping, folding, table setting, cooking, and so on. These activities provide children with practical experiences. By observing and participating with these activities, children will learn their cues, feel good about their accomplishments.

Children learn to use their five senses to explore the world around them through the constant use of their senses. The

the sensorial area provide an opportunity for children to observe the differences and similarities in what they see, hear, feel, taste and smell. Sensory materials in the classroom help children distinguish, categorize and relate new information to what they already know.

LANGUAGE

The development of language begins with speech and progresses into reading and writing. Children develop bilingual language skills through meaningful experiences listening to stories and poems, participating in fingerplay, having opportunities to talk and be heard.

MATH

The world of math comes alive for a child in a Skeyci children program environment! Math activities stimulate a child's inquisitiveness -- a crucial factor in the learning process -- and gives children a hands-on approach in developing basic numerical concepts while learning at their own pace. Children are indirectly preparing for math as they discover similarities, compare differences, find sequences and explore the world around them.

CULTURE

Children gain an awareness of the world around them by exploring geography, history, other countries and their customs. As children explore puzzle maps, they gradually learn the names of the countries and continents. Through related materials, children learn to appreciate and recognize the importance of people and places around the world and in our own community.

SCIENCE & NATURE

Science promotes cognitive development through stimulating a child's natural curiosity. Children are given hands-on, real life activities that either have a predetermined conclusion (teaching cause and effect) or are open-ended to encourage a sense of exploration and discovery.

ART & CREATIVITY

Art is an important part of our curriculum, allowing for self-expression and fine motor skill development. Children explore colors, textures and patterns, developing visual and sensory abilities.

MUSIC & MOVEMENT

Through music, children learn to hear differences in sounds, discover rhythm, increase vocabulary and experience its impact on moods.
