Are you new to making beats? Are you thinking about buying a D.A.W. but don't know where to start, then I would go with FI Studio 12. Its real easy to navigate and its great for someone just learning how to make beats .

I started making beats with Logic 9 for apple but after a few years I switched to FI studio.. You might here that Pro tools and Logic are better but its all preference and whats good for what you are trying to accomplish as a musician..

Any ways if you are someone that is wanting to get into music production but doesn't know where to start then let me be your coach /teacher..
