Calling all DJs who are still passionate about the Music

Location Kentucky https://www.genclassifieds.com/x-258807-z

If you're a DJ/Producer with, first and foremost, an unquenchable love for music, and you're looking for other like-minded individuals who share your passion...

If you truly understand what it means to work your ass off purely for the satisfaction derived at the end of the day from doing something you love and not just for money, sex, fame (although these things may be nice byproducts along the way)...

If you're looking for chill, decent people to collaborate with, bounce ideas off of, shoot the shit with, have a beer with, create music with, and eventually, perform onstage with...

Then contact me. People of all skill levels are welcome but the caveat is this:

This will be a group of DJ/Producers who won't hesitate to say "piss off" if some jabroni tries to tell them what to play and how to play it. This will be a group of people who puts the Music first and foremost and their egos.
