Hi, my band is looking for a new rhythm guitarist. We're currently a 4 piece (Drums, Guitar, Bass, Keyboardist) that have been playing together for over a year and a half. We have a catalog of music and are looking to hit the recording studio to record an EP soon.

We draw influences from a variety of genres. The drummer is pure death metal, the guitar is Periphery meets Black Dahlia Murder, our bassist is impressionable, and we come equipped with a classically trained pianist laying down tasty keys.

Here's a low quality little video of one of our jams, without keys. The guitarist on the right is no longer with us.

We're looking for someone with experience, that can tremolo pick and shred well. Versatility is a plus.

If this sounds like something you'd be interested in, e-mail me for some music files or shoot me a text.
