Vocalist here in search of people with the skills and gear to make some great music. Serious, determined, Focused with no major drug and alcohol issues. Heavy style is preferred. Metal Groove with amazing leads, breakdowns, kick downs, fast shredding. Drummers please be versatile with great hands and feet, good gear(less is more). I've seen a 4 piece sound just as big as a 7(its the drummer not the drums). Bassist that can shred, finger, slap, pick.

I have worked hard and been in a few good bands. I have a level head and great connections and skills to bring this project as far as we can. I moved back to New England seeing many people I know play amazing music.

I am looking on Craigslist for fresh talent. I have done so with most of the bands I have been with. also through people I know. Also lived in Virginia with a successful band there. I want to record and play a few shows perhaps travel New England. We will see based on everyone together and schedules.

We will all shine on stage together and individually. Auditions can be recordings or I come to.
