Hi, I am seeking a good recording studio to record my new artist that does mixing mastering, beats, etc. You will need to have good sound quality and a reasonable pricing. If you are not an actual licensed studio you will receive half upon you following up on your end of the project. We would like someone that can possibly do cd cases, imaging, etc. If you can message me your information or website, pricing for package deals, if you work with rap/hip hop artist, can create beats, and a link to a song that you have done so I can listen to the sound quality.
