I do computer repairs (see ad link below) and I have a genuine serial key left for Windows 7 Ultimate. However, I do not have the dvd/packaging for it but it's just the serial key which will suffice. You can install the operating system from a USB stick or burned DVD and then just use the genuine key to activate it with Microsoft. It doesn't need to be a actual retail DVD to be genuine, just the serial.

I can provide a DVD with the installation files on it. It works the same as a retail DVD. I can also help if you would like to install from a USB stick.

I can also help with the installation (see computer repair ad below). I won't charge much if you need a little help with the installation. Again this key is only good for Windows 7 Ultimate in 32bit or 64bit.

Ultimate is the most advanced/best version of the Windows 7 Operating System that you can get. It retails for about \$125 - \$175 so you're getting a great deal here. I am selling it because I use Windows 8 despite many other's negativity towards it. Many people still prefer Windows 7.

Also I mentioned that there's a free upgrade to Windows 10! That's right Microsoft announced recently that when Windows 10 releases (hopefully this fall), you'll be able to upgrade to it for free within the first year using your genuine copy of Windows 7 or 8.

I've sold a few Home Premium serial keys before and every customer has been happy.

Give me a call, text or email and let me know if you're interested.

Microsoft software can be found on Amazon. See it still goes for a bit so, again you're getting a great deal here.

Any tech can confirm that all you need is the genuine key and you're good to go. It's as good as a brand new copy. The dvd and packaging is completely unnecessary. I will provide a burned dvd in 32bit or 64bit.

Also willing to trade for Nintendo 3DS games and/or accessories.
