This is the perfect accessory for the portrait photographer. The beauty dish has an internal light shield that allows bounce-only lighting. This provides high output making it a perfect soft light source for portraits. It will also provide moderate round catch lights in the eyes where a softbox will yield larger rectangular catch lights. This Beauty dish is made of 100% aluminum with superior design. Honeycomb grid could be easily removed and attached.

I also got the brown box for easy carry.

Note: a small dent. has no effect on.
