CUMMINS OWNERS!!!!!

Running a special on heavy duty built cummins 48RE 47RE 518/618 transmissions with a new billet torque converter for only \$2500!!!! These are built to handle high horsepower/torque cummins engines. As long as you have a great aftermarket cooler system this transmission will last a very very long time. Dodge cooler systems are a major problem for the transmissions. If you pull daily or have a programmer this is the transmission you want for half the cost of the big name brand companies who overcharge for the same build. Heres a list of what's in side.

High energy alto clutches with hardened teeth
High energy wide raybestos bands
New kolene treated steels
stacked clutch packs made for pulling
High volume pump
Custom Transgo shift kit
Transgo valve body updated plate
New borg Warner adjustable pressure solenoid
New pressure switch
New speed sensor
New gaskets seals bearings washers and filter
