Just wanted to give everyone who doesn't already know a heads up, don't send your resume to just anyone on this site. A very large percentage of gigs offered on this site are fishers looking for email addresses, full names, phone numbers, home addresses, etc. These people then sell that information to who ever pays for it. Which in turn leads to multiple phone calls and even identity theft. This site used to be awesome for gigs but now it's a haven for scams. Good luck to.
