

Kratom leaves have recently gained popularity as one of the most powerful and natural medicinal plants for pain. I have well-loved, organic, well-rooted clones to offer those in need here in Portland. Normally, these sell for fifty dollars or more online (as they are particularly hard to propagate), but only if you can find them in stock. A Kratom plant is a great investment for your future! Give me a call and let me know when you would like to pick up this wonderful plant.

Category:
Perennials
Trees
Tropicals and Tender Perennials

Height:					
over 40 ft. (12 m)					
USDA Zone 9a: to 28.9 Â° F (-2.3 Â° C) USDA Zone 9b: to 31.7 Â° F (6.6 Â° C) USDA Zone 10a: to -1.1 Â° C (30 Â° F)					
There are multiple reports of Kratom trees wintering over outside in colder climates (regrowing leaves in the Spring), but I cannot guarantee outdoor winter survival in Portland.					
Sun Exposure: Sun to Partial Shade
