It pains me to do this, but unfortunately I am unable to properly care for my Chinese Water Dragon. He is a little over a year old, and is about a forearm length long (from my finger tips to elbow). Aside from losing his tail last March (which has grown back just not as long and a solid color) he is in great health. He is fed daily with crickets and a variety of wax, meal, and super worms. I just don't have the time I used to have to socialize with him. Please let me know if you'd be able to take him in and give him the attention he needs. Will also include any food that I have left for him. Will also send pics upon request. Also if you want his entire set up I'm only asking \$50, however you will have to haul it out. Will send pics upon
