JavaWeb.net Computer Science Tutoring (35hour) (Washington)

Location **Washington**
https://www.genclassifieds.com/x-261579-z

The tutoring method that is used follows the University of Washington Computer Science & Engineering program. But it also applies to other schools in Seattle area. 80% of the session will be coding. There are sample assignments that are close to CSE 142/143 homework. The midterm and final problems can also be covered. All lecture questions are explained assuming you have zero programming knowledge and skip through the parts you know.

Due to a severe injury, I am only able to work part-time. Sometimes I'm unable to take tutoring jobs due to these limitations. First hour is 100% refundable if not satisfactory as long as it's scheduled around Ballard area.

Subjects:

Computer/Science:

C#
Java
Visual Basic
VBA
Python (new)

Web Programming

HTML
CSS
Javascript
Web Design
Dreamweaver
All related questions

General Computer

Desktop Publishing
