

1959 Michigan 75A Loader (5500,,- USD)

Location

Vermont

<https://www.genclassifieds.com/x-261591-z>

1959 Michigan 75A loader. Waukesha 190 engine completely rebuilt. Rebuilt torque converter, rear axles, planetaries, and steering. New master cylinder, the brakes work on this one, unlike most others. Parking brake has been unhooked since I've had it, all the parts are there. Recored radiator. N.O.S. fuel pump and muffler. Machine does everything its supposed to do. All lights, windshield wiper, and even the heater work. Has the side panels which are missing on most of these loaders. Very reliable, started and ran all last winter every time it was needed. Original operators and parts manuals included. Has canvas sides that attach to the cab for winter. Come check it out, there's no charge for looking. I have four times the selling price invested in parts and labor, and have all of the receipts. If this listing is up, the loader is still available! Click on the contact tab in upper left for contact.
