

Custom 97 Polaris RMK 700 (2500 USD)

Location **South Dakota**
<https://www.genclassifieds.com/x-261668-z>

Selling the last of the 3 custom '97 RMK 700's we built a few years ago. Started with a '97 SKS and stripped it down to the bulkhead. The engine was gone through by Indy Specialty in MN and has very few miles on it, less than 500 I would say, and has the sought after 220 heads. The carbs have been converted from Keihin's to the Mikuni rack carbs and it has the ATACC system for automatic altitude and temperature compensation. We use a rear suspension out of a Ski-Doo summit and put a 151" track on it, very good condition. The front suspension has the Fox shocks from an XC and custom rebuildable/lightweight trailing arms. The body is from a GEN II chassis, hood/seat/gas tank are all in great condition. This is an overall good running sled that has a lot of new/updated parts.

SLP Pipe/Can.
Anti ratchet drivers.
Dropped and rolled chaincase.
2" x 151" track.
VForce 3 reeds.
U-Cooler extended length tunnel cooler.
Pivoting Handlebar riser.
Gen II seat/gas tank.
Engine gone through last year from the crank to the heads by one of the area's top engine builders.

Asking \$2500.00.
