

Need Help With Paralyzed Dog (menomonee falls)

Location **Wisconsin**
<https://www.genclassifieds.com/x-261967-z>

Katie, a 3 year old Beagle/Walker mix has been paralyzed for a year. The doctors say she has intertabral disc disease. She blew a disc, was operated on, but it was not successful. She is very active, has a cart for walks, and is very smart. The other co-owner and I have been able to schedule for the daily care she needs, but he has had a change in scheduling. She needs to have her bladder and bowel expressed every 4-6 hours. We are hoping for a kind and caring person to come to Kate's home in Menomonee Falls a couple of times a week, if possible, one day a week would even be of help! The time she would need would be around 10am. It would take about 15 minutes of your time, but save Katie from possible bladder infections. It is not that hard of a process, but be prepared for the occasional mess. Please let me know if you would be willing to at least watch the process and see if you could help! Thank you for your kindness!
