

Hypo Citrus Tiger het Trans Male Bearded Dragon (Chesterfield)

Location **Virginia**
<https://www.genclassifieds.com/x-266244-z>

Hi,

This guy came from Dragon Fortress and he is just gorgeous. He hatched out in October 2014, so he's about 3.5 months old now. He's perfect in every way. No nips, no scars, enthusiastic eater - he even eats his greens!

Genetically he is a Hypo Citrus Tiger het for Translucent. Lots of solid genetics in this pretty little guy. I would love to keep him, but he doesn't fit into my breeding plans. I simply have too many males. This guy would be an excellent pet or breeder.

I am asking \$75 or best offer. No supplies are included.!
