Hi there,

If you seek to learn elementary/middle school math, I'm the tutor for you. I have a BA degree and 9 math credits. I also plan to teach chemistry and have a lot of practice with math(since chemistry is mostly math). I tutor high school students in math now and I can help with elementary and middle school math too. I'm proficient especially at algebra. I enjoy college math too and working with people of various classes and levels in math. I charge \$22/hour but I will negotiate with you. No problem. Please contact me if interested.

Thank!
