50 Gal Heat Pump style water heater

This is off the home depot web page

The Rheem EcoSense 50 gal. Hybrid Heat Pump Water heater is the most efficient electric water heater in its class. The integrated heat pump module removes heat from the surrounding air and transfers it to the water inside the tank. An energy factor of 2.45 reduces operating costs by \$329 annually when compared to a standard 50 gal. electric model. Incoloy stainless steel elements provide backup heating capacity during periods of high demand or when ambient air drops below 37 degree F. The water heater features a full-color touch screen LCD display with intuitive controls and diagnostic capabilities. A 240 volt electrical connection is required for installation. The patented magnesium anode rod design incorporates a special resistor that protects the tanks from rust, providing longer tank life. Factory installed temperature and pressure relief valve and 3/4 in. water connections are included with the water heater for easy installation. This model has a 12 year limited tank and parts warranty plus a 1 year in home labor warranty. This Rheem EcoSense Hybrid model is Wifi compatible allowing for remote monitoring of the water heater's operation (WiFi Module REWRA631EWH sold separately).

12 year limited warranty on tank and parts for your convenience

1 year in home labor warranty for peace of mind

2.45 energy factor makes this water heater the most efficient in its class

Energy Star qualified

Ambient operating range between 37 -120 degree F is the widest in its class

Meets all requirements for tier 1

Full color touch screen display with intuitive controls

Compatible with Rheem EcoNet Home Comfort Wifi Module (sold separately) for remote monitoring of the water heater's operation

Incoloy stainless steel elements

Element dry fire protection system

Requires a 240-volt connection for installation

Narrow 20 in. tank diameter easily fits through access doors

Wifi compatible with the purchase of Rheem EcoNet Home Comfort Wifi Module (sold separately) for remote monitoring of the water heater's operation (WiFi Model # REWRA631EWH)
