

Quad and golf cart welding (1 USD)

Location **Arizona**
<https://www.genclassifieds.com/x-279401-z>

I can weld that cracked or broken quad or golf cart transmission. Don't throw it away!! Salvage it, get more use out of it by having me repair it or repair it and save it as a backup unit if you decide to get a new one.

Shown is a transmission repair of an off-road modified golf cart. Tranny case cracked due to over torqued setup. I drilled holes at the end of the cracks so they wouldn't travel after welding, cleaned it and welded it right up. Good as new!

I work with all metals and like most welders, custom fabricate to your specifications. Shown is a picture of a truck transmission repair that saved big money by not requiring replacement.

I have over 30 years experience in the metal trades and specialize in repair and maintenance welding. For more info call Tony: Sorry, I don't respond to texts.
