I've got a pretty nice 1974 CB360 that would be a steal for someone. It's more of a mini project (needs float level set and just fine tuning in carbs) but it does start up and run great. Not gonna be able to drive it home, but she runs. Besides the little carb issue it is 100% road ready. Engine is absolutely solid and it also has about a \$300 2-1 exhaust on it that roars. Be on the road in time for riding season. I've just got 2 other bikes that need more attention so this ones gotta go.

1400 obo. Open to some trades
