

Water Heater Installation Affordable (Same Day Service) (Louisville)

Location **Colorado**
<https://www.genclassifieds.com/x-279608-z>

Hi, I'm John, a general contractor/ handyman specializing in all things plumbing including water heater installations. I'm an experienced individual with many references. I like to make the process as quick & stress free as possible for the customer and myself.

I can advise on types/brands of heaters as well as suggest proper plumbing techniques to get it in the most efficient way. I charge \$250 to install a heater in a "standard installation" meaning the old one can come out and the new one can go in using existing plumbing/gas lines to a degree of minimal adjustments. This does include picking up the new heater and delivering it as well as haul off of old heater. It takes roughly 1 hr for a standard installation.

Thanks for looking at this ad. I look forward to hearing from you!

johnny
