

We have a comfortable office in both Santa Rosa and Santa Cruz from which to work with remote collaboration options, we also work long hours but enjoy flex time to accommodate our other interests in life.

We offer a chance to get involved with a startup close to the ground floor, experience building and supporting software and a chance to make a difference.

â€¢ You've done mobile development before and can point to at least one project you are proud of. Tell us about what you have created be it on the app store or something you created for your friends.

â€¢ You are comfortable with algorithms and data structures. You're comfortable with the tools of the Computer Science toolbox, and are comfortable deploying them in the form of working code.

â€¢ We are looking for both iOS and Android experience but will consider a willingness to learn.

â€? Ambition, tenacity and a never give up drive.

â€¢ You enjoy working with a small dedicated team driven to exceed.

â€¢ You enjoy creating cutting edge technology.

â€¢ You take responsibility of your work.

If this position interests you, tell us about your skills, how you are passionate about and how you can be a valuable part of
