Paid Studies at UCSF- \$50 Cash (inner sunset / UCSF)

Hello! We are looking for participants to be a part of our studies at the University of California, San Francisco.

The study examines your body's physiological responses while you engage in resting versus active tasks after being given a small dose of either a hormone (oxytocin) or placebo.

The study has 2 parts:

- 1) a 30 minute online survey you complete at home, and
- 2) a 2 hour lab visit at our facilities at UCSF in the inner sunset.

During the study, you will have several non-invasive sensors placed on your body to measure things like blood pressure and heart rate. You will also complete several questionnaires, play a couple computer games, watch a video clip, and participate in a few interaction tasks.

You will be paid \$50 immediately after your participation.

If you are interested, please send the following information:

1) Name

2) Gender
Ethnicity
