Capitalism and fascism are very similar. When capitalist greed starts taking over the democracy and suppressing voter rights and a supreme court that decides corporations can put untold amounts of money into our democracy, it ceases to be a democracy and morphed into fascism. Unfortunately a certain group of our electorate can't wrap their minds around what's happening to our country. Has nothing to do with Obama and everything to do with blinded rage politics. You are too blinded by social issues and theocracy to understand what's actually happening. Our power as voters is being taken away by the obscene amounts of money being poured into OUR democracy.

Of course you stupid pubes would swallow a fascist theocracy if they tickled your balls the right way.

Our founders would line you all up and shoot every last one of you treacherous sons a bitches for destroying the American dream.

EAT IT!
