

Project Management (state wide)

Location

Alaska

<https://www.genclassifieds.com/x-279961-z>

Is there a construction project in your future that needs to be done but you either do not have the time to manage it or can't take the time away from other responsibilities. Why tie yourself to a project when you have other life responsibilities to attend to.

*I have a degree in Construction Management,

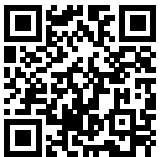

*I am a General Contractor,

*I have 22 plus years in the construction trades,

Sometimes a project can seem overwhelming at the beginning why not let someone who have been down those roads before handle management for you from inception to occupation.

Energy savings, sustainability, and innovation are the approaches I take to a project. Our Clients, Safety, and the Alaska Environment come first.

Give me a call or text and lets get together and discuss how we can work together,
